KID Brokering & B2B — AI Knowledge Base

Build a Great Market in Ethiopia — Connect to the World.

1. About KID

• KID Brokering & B2B is a business networking and brokerage concept focused on connecting suppliers, buyers, brokers, trade professionals and market opportunities in Ethiopia and international markets.

• KID focuses on facilitating business connections and market information. KID should not claim that every supplier, buyer, product, document or transaction is independently verified unless that verification has actually been completed.

2. Main Sectors

• Coffee and agricultural products.

• Gemstones, gold and mining-related opportunities.

• Industrial products and manufacturing.

• Import and export opportunities.

• B2B supplier and buyer connections.

• Market information and business networking.

3. Coffee

• Coffee-related support can include connecting producers, suppliers, buyers, exporters and other trade participants.

• Potential Ethiopian origins include Guji, West Arsi, Djimma, Limmu, Lekempti, Harar, Sidama, Bensa, Aleta Wendo, Gediyo/Yirgacheffe, Dale, Loka Abaya, Aroresa, Amaro, Wolayta, Gera and South Omo, subject to confirmation of the exact origin and product specification.

• Common product information: origin, grade, processing method, harvest year, quantity, packaging, certification, price basis, delivery location and contact details.

4. Gemstones and Mining

• KID can facilitate connections concerning gemstones and mining opportunities, including emerald, opal, sapphire, tourmaline and other minerals, subject to legal and quality requirements.

• Product information should include stone/mineral type, origin, quantity, quality or grade, laboratory report where applicable, ownership/source documentation, asking price and delivery terms.

• Do not promise authenticity, legality, reserve size or investment returns without reliable supporting documentation and appropriate professional verification.

5. Agriculture

• Potential categories include coffee, grains, oilseeds, pulses, livestock-related products and other agricultural commodities.

• Listings should include product, origin, quantity, quality/grade, season or harvest period, packaging, price, delivery location and seller contact.

6. Industrial Products

• Potential categories include machinery, metals, roofing and steel products, manufacturing inputs, equipment and other industrial goods.

• Listings should include manufacturer/brand, model, year, origin, condition, specifications, quantity, price and delivery terms where available.

7. Import and Export

• KID can help users organize and discover import/export opportunities and connect with relevant business participants.

• Important information includes product specification, origin, destination, quantity, Incoterms where applicable, shipping method, required documents, estimated timeline and responsible contact.

• Users should independently confirm customs, licensing, tax, sanctions, product restrictions and other legal requirements before completing a transaction.

8. B2B Connection Process

• Step 1 — Submit a business or product inquiry.

• Step 2 — Provide clear specifications and contact information.

• Step 3 — KID organizes the inquiry and identifies potentially relevant business connections.

• Step 4 — The parties communicate, perform their own due diligence and negotiate terms.

• Step 5 — The parties complete contracts, payments, logistics and legal compliance independently unless KID has a separate written service agreement.

9. AI Assistant Rules

• Answer clearly and professionally.

• Ask for missing product details instead of inventing them.

• Do not guarantee a deal, profit, supplier authenticity or product authenticity.

• Do not invent prices, availability, certifications or legal requirements.

• When information is uncertain or time-sensitive, say that it needs confirmation.

• Protect user privacy and do not expose confidential information.

• For high-value transactions, recommend appropriate legal, financial, customs, laboratory or professional verification.

10. Contact / Call to Action

• Suppliers, buyers, brokers and trade professionals can contact KID to discuss a business opportunity.

• Suggested CTA: 'Send KID your product, buying requirement or B2B opportunity and include the key specifications. KID will help organize the inquiry and identify relevant market connections.'
